1. 1: Field Optimization of an Inexpensive Colorimetric Assay to Measure Cyanopyrethroid Insecticides on Treated Fabrics and Walls

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

Background: Insecticide-based interventions are used in many vector control programs worldwide for managing diseases such as malaria and dengue. Insecticide-impregnated fabrics, (e.g. bed nets, curtains and clothing), as well as insecticide spraying onto walls (indoor residual spraying) have been shown to be effective in reducing vector-borne disease transmission by providi ...

2. 2: Novel and Simple Diagnostic Tools for Malaria Parasite Detection in the Field and Innovative Tools for the Detection of Drug Resistant Malaria Parasites in the Field

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

Background: Malaria continues to be a global public health challenge contributing to at least an estimated 800,000 deaths and more than 240 million clinical illnesses affecting mostly young children in Sub-Saharan Africa and other tropical countries. Development of resistance to cheap antimalarial drugs such as chloroquine and sulphadoxine-pyrimethamine has led to adoption ...

3. 3: Diagnostic Needs for NTD Programs

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

Background: Neglected tropical diseases (NTDs) are bacterial and parasitic infections that disproportionately affect poor and marginalized populations around the world. A subset of NTDs, including lymphatic filariasis, onchocerciasis, schistosomiasis, trachoma and intestinal helminth infections, can be targeted effectively through mass chemotherapy. These NTDs are not consi ...

5. [6: NATIONAL CANCER INSTITUTE \(NCI\)](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

The goal of the NCI is to eliminate the suffering and death due to cancer. The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Programs are NCI's engine of innovation for developing and commercializing novel technologies and products to prevent, diagnose, and treat cancer. NCI's SBIR and STTR Programs offer funding in nanotechnology, anti-c ...

6. [1: Center to Reduce Cancer Health Disparities](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

Established in March 2001, CRCHD is the cornerstone of the Institute's efforts to reduce the unequal burden of cancer in our society. A central goal of the Center is to translate research discoveries into policies and/or services aimed at reducing cancer-related health disparities in racial, ethnic, elderly and medically underserved communities. To learn more about the Center, please vis ...
